Masterclasses

Every expert will give a Masterclass in the morning hours, from 09.00-11.00 hrs prior to the lecture, (except the Masterclass of Prof. Colditz , which will be the day before the lecture from 13.30 - 17.00 hrs.) for PhD Students and young Postdocs. 6 PhD Students / Postdocs will present their ongoing research followed by discussion, and comment by the expert. Apart from the presenting PhD Students, other individuals interested are encouraged to be present.

Venue: Universiteitssingel 40, Room 0.731, Time: 0900-11.00 hrs. PLEASE NOTE that the venue of the Masterclass of 19 September will be communicated later.

For participation in a Masterclass, send email message to: Y.Sondeijker@nutrim.unimaas.nl

The deadline for application is two weeks before the scheduled Masterclass.

The participants should have basal knowledge on biochemistry, molecular genetics and statistics. Direct involvement with genomics and genetic epidemiology is not required.

Who will be invited?

The NUTRIM master classes will be broadly announced. Invitations will be sent to:

- Dutch Universities and institutes within the field of nutrition, metabolism and toxicology
- All food and pharma industry in the Netherlands
- International universities and institutes within the EU region

Fee

The fee for PhD Students is g 150,-. UM/VLAG PhD Students are free of charge.

Consultancies / Meet the Master

After the lecture the expert will be available for meetings with researchers or small research groups. The consultancies are scheduled from 14.30-17.00 hrs. Please contact the Organising Committee if you are interested to consult the master.

Previous speakers

- Prof. Dr. Eric Ravussin, Pennington Biomedical Research Center, USA
- Prof. Dr. David Kelley, Obesity/Nutrition Research Center, USA
- Prof. Dr. Jeffrey Friedman, The Rockefeller University, USA
- Prof. Dr. C. Wild, Leeds University, UK
- Prof. Dr. Henri Brunengraber, Case Western Reserve University, USA
- Prof. Dr. Steven E. Shoelson Harvard Medical School, Associate Director of Research, Joslin Diabetes Center

NUTRIM Lecture Series 2006/2007

The Nutrition and Toxicology
Research Institute Maastricht

The Nutrition and Toxicology Research Institute Maastricht (NUTRIM) is an interfaculty research institute of the Faculties of Health Sciences and Medicine of Maastricht University in co-operation with the University Hospital Maastricht. Within NUTRIM, 15 biomedical, clinical and behavioural-science departments co-operate in the implementation of scientific research in the fields of nutrition and toxicology and in the education of PhD-students. NUTRIM participates in the Graduate School VLAG (Food Technology, Agrobiotechnology, Nutrition and Health Sciences), accredited by the Royal Academy of Arts and Sciences (KNAW). NUTRIM is a partner in WCFS (Wageningen Centre for Food Sciences), one of four Leading Technological Institutes established in 1997 at the initiative of and with support from the Dutch Government. These unique consortia of government, industry and research aim to stimulate the transfer of knowledge generated in fundamental research to Dutch industry and thus to strengthen its innovative power and competitive strength.

NUTRIM LECTURES

In order to further enhance the scientific standard of nutrition and to stimulate international exchange in this field, NUTRIM organizes five NUTRIM lectures yearly for which an international recognized expert in the field will be invited to give a lecture and a Masterclass. The expert will also be available for interviews/consultancies.

The lectures will cover all main research areas of NUTRIM and are not only aimed at a NUTRIM-wide audience but also at Dutch Universities and institutes within the field of nutrition, metabolism and toxicology, all food and pharma industry in the Netherlands and International universities and institutes within the EU region.

Organising Committee

Dr. Pieter Dagnelie, Department of Epidemiology
 Dr. Matthijs Hesselink, Department of Movement Sciences
 Dr. Patrick Schrauwen, Department of Human Biology

date	lecturer	title lecture
24-01-2007	Prof. Michael Roden, Division of Endocrinology and Metabolism, Medical University of Vienna	Environmental modulation of insulin action in muscle and liver
28-03-2007	Prof. G. Boeckstaens, Department of Gastroenterology & Hepatology, Academic Medical Centre Amsterdam	Neuroimmune interaction: from bench to bedside
21-06-2007 (20-06-2007 masterclass)	Prof. G. Colditz, Harvard Medical School of Public Health, Boston	Application of epidemiological research in risk prediction models and cancer prevention*
19-09-2007	Prof. W. Stahl, Institut für Biochemie und Molekularbiologie, Heinrich-Heine Universität, Düsseldorf	Beneficial skin effects of micronutrients

*) preliminary title

Time: 11.30-13.15 hrs.

Venue: Debeyeplein 1, room Doo1.

PLEASE NOTE that the venue of the lecture of 19 September will be communicated later.
